

WEDGE

FLYING
THREE SIDED PYRAMID

This Skin is based on the Classic Centuri kit -
THE POINT!

"Build It - Watch It Fly - And Wonder Why!"

Available from Centuri from 1969 - 1972, catalog # KC-13.

A reproduction kit is available from Semroc at

www.semroc.com.

DIRECTIONS FOR BODY SKINS:

Make three copies of the skins.

Cut out Copy 1 leaving on both Tabs 1 & 2.

Cut out Copy 2, cutting off Tab 1 and leaving on Tab 2.

Cut out Copy 3, cutting off both Tab 1 & Tab 2.

Spray the back of Copy 1 with Spray Adhesive. White Glue is not recommended for the flat faces, it will wrinkle the paper.

Line up the tip of the Copy with the Tip of the Wedgie rocket. Lay the copy over the side and press into place. Check both sides for straight alignment. Peel off and reposition if needed. Add a thin coat of White Glue to the tabs. Roll the Tabs around the corners and burnish in place.

Glue Copy 2 (the copy without Tab 1) to the right, on the second wall. Roll and glue Tab 2 around the corner on to the remaining third wall.

Glue Copy 3 (the copy without tabs) to the remaining wall.

Trim any overhanging edges with a sharp razor blade. If any edges are lifting, push white glue under with a knife blade and burnish.

Press over the Launch Lug location to find it's edges. Punch through the paper skin with a knife and trim to the slot sides.
